

THE WORKPLACE EQUALITY FUND

Funded Organisations – Round 2

Adopt an Intern

Project Name – Diversity Works

Funded Amount - £44,539

Project Summary - AAI will create 4 opportunities in 3 geographical areas across Scotland (Glasgow, Edinburgh and Aberdeen) for 4 private sector partners and 40 other employers, to meet job-seeking BME women and discuss how best to create accessible pathways to employment. These will be interactive sessions for BME women to tell their stories in an informal, welcoming atmosphere, to encourage dialogue with employers, and to focus on their aims, aspirations and the challenges they face reaching them. Exchanging views with BME women will develop awareness of and increase the use of the Fair Work Framework. Five BME women will also benefit from internships with five host intern companies.

ARAMARK LTD

Project Name – Stepping into your Future (Embracing and Enhancing our Diverse Workforce)

Funded Amount - £40.054

Project Summary – Aramark have a predominately female workforce (66%) & an ageing workforce (40% are 50+). It has been identified that these numbers are not reflected in promoted roles. Following discussion with their workforce, a number of issues were highlighted which act as barriers to them applying for opportunities for career advancement and personal development. These included lacking confidence and self belief in taking on new roles and concerns about their IT Skills. The project focuses on addressing the specific needs of these groups and overcoming what they indicated is acting as barriers to them contemplating and applying for roles leading to career advancement.

Beatson Cancer Charity

Project Name – We're With You at Work

Funded Amount - £33,425

Project Summary – The organisation undertook research in partnership with nineteen Scottish businesses, which highlighted significant gaps in knowledge and resources to support individuals affected by cancer and identified opportunities to improve. The project has engaged five employers as delivery partners who support 95,000 staff collectively. Together with them the project team will develop and test a range of tools which will give staff the confidence, knowledge and skills to support employees affected by cancer. As a result, employees with a cancer diagnosis and their families will experience more consistent and appropriate workplace support during their cancer journey.

Brightworks Consultancy

Project Name - FAIR Project

Funded Amount – £45,975

Project Summary – The FAIR project focuses on bringing inclusive recruitment practices from the public sector into the private sector through piloting an innovative online recruitment tool, The Role Mapper, with one of Scotland's largest private sector employers. The project aims to open up employment opportunities to groups currently locked out of the employment market by removing barriers in the recruitment process and embedding Flexible And Inclusive Recruitment and job design (FAIR) through the use of the Role Mapper tool. It will address bias and inequalities in current recruitment and job design practices that lead to the exclusion of certain groups and reduce access to fair work. It will also highlight how new practices can be embedded and scaled in business-as-usual activities. The learnings and insights gained from the pilot will be shared with over 30 employers across Scotland. The project will impact all employees, with a particular emphasis on women and older workers. The project will focus on specific roles in the business across 5 core areas in Scotland: Aberdeen, Inverness, Perth, Glasgow, Stirling.

Enable

Project Name - SPECTRUM

Funded Amount - £35,000

Project Summary – Enable will improve employment opportunities for people of an ethnic minority who have a learning disability or Autistic Spectrum Disorder across the Glasgow city region. This will be achieved through working with leaders in Glasgow’s eight growth sectors and identifying the barriers to their recruitment and retention of disabled people and people from a minority ethnic background. In collaboration with 20 leading businesses, a series of toolkits and training will be developed with an industry focus. 20 training sessions will be delivered to staff at all levels of each business and a suite of 2 formal best practice guides themed around each sector and addressing specific issues identified, will be published. 20 individuals with a disability and from a BME background will also be engaged, 18 of whom will undertake work-based learning and 10 of whom will enter employment. This best practice and training will be shared nationally, engaging with industry networks for each of the 8 sectors through Enable’s own national teams, in order that this learning is applied on a national scale.

Into Work LTD

Project Name – Equality Works

Funded Amount - £22,500

Project Summary - Equality Works will work with up to three private sector partner organisations to support them to improve their knowledge and practice specifically around recruitment and retention of disabled people. This will help them recruit from a wider pool of candidates including disabled people, more confidently and help improve their staff retention rate. Real case study scenarios will be used to demonstrate challenges around supporting people with different health conditions and the impact of different disabilities on a person in work will be discussed. Effective solutions will also be looked at and discussion will include the positive impact of reasonable adjustments and the dispelling of myths around how difficult or costly they are. This will be achieved through the delivery of appropriate training to managers of change or policy or from recruitment, diversity and HR departments.

John Graham Construction

Project Name – Fairness, Inclusion, Respect – Strengthening Inclusiveness in Construction

Funded Amount - £37,956

Project Summary – This project is designed to challenge and educate the current and future workforce on issues around bias. Graham Construction has offices & projects throughout Scotland, and they will deliver training sessions face to face and provide online learning tools as an additional resource which will allow them to reach all current staff and new staff coming into the business. The beneficiaries will increase as Graham Construction employ new workers. It is anticipated that the initial number of beneficiaries will be approx. 250. In the long term the organisation is keen to identify ways in which their supply chain partners can access this training.

Moving On Employment Project (MOEP)

Project Name – Employ Ability Shetland

Funded Amount - £42,810

Project Summary – The project will engage with four local employers to raise awareness, provide training and develop understanding of disabilities. MOEP will work with employers and employees to develop their understanding and challenge assumptions and stigma regarding disability within workplaces. Six training sessions will take place with each of the four targeted businesses within their workplaces during the length of the project. Delivering the project to employers, management and staff will enable the project to build confidence within the workforce and allow staff to undertake targeted specialised training (such as disability and Autism awareness). This will enable staff to mentor and support colleagues within the workplace.

The project will also provide two showcase events for wider business and industry groups in Shetland. This will enable targeted employers to share their experience and learning with peers.

Scottish Union of Supported Employment (SUSE)

Project Name – Fair Chance

Funded Amount - £32825

Project Summary – The Fair Chance project will build the capacity and improve the recruitment processes of 6 private sector employers. The project team will conduct a Disability Equality Audit of the employers' recruitment processes, with particular regard to their digital recruitment platforms, reasonable adjustments available and positive actions to improve the diversity of their workforces. They will also conduct user testing of the employers' on-line recruitment process by people who have a range of disabilities including people with learning disabilities, people who have autism, people with a visual impairment and people who have a physical disability which affects their co-ordination or mobility. Feedback will be provided and recommendations made on how the accessibility of the recruitment processes used by the 6 employers can be improved and suitable actions agreed. Managers from each employer will benefit from SUSE's Inclusive Workplace Training. Learning and recommendations from the project will also be disseminated to the 45 member organisations of SUSE.

The Research Centre (TRC)

Project Name – RAD: an inclusive approach to broadcast research and development talent

Funded Amount - £20,709

Project Summary – TRC developed the rad programme to help address the issue of production companies having difficulty recruiting relevant staff from diverse backgrounds. By enabling companies to identify and employ new talent from diverse communities for a period of 12 months as part of a supported training programme this both creates a talent pool of candidates from diverse backgrounds for the sector and provides direct benefit to the participating businesses. Key Objectives of the project include: the development of leaderships skills in the participating businesses; development of companies by introducing new cultures, outlooks and experiences to their development process; training of businesses in how to engage in new recruitment practises; tackling issues relating to lack of diversity by creating new skilled jobs for individuals from diverse backgrounds. This training will take place in Glasgow for up to 7 beneficiaries.

Outside the Box Community Development Support

Project Name – Mums returning to work

Funded Amount - £22,364

Project Summary – Mums Returning to Work project will work in partnership with a local children’s nursery to produce a training resource that informs best practice in supporting women through maternity and on their return to work. The resource can then be used by other small employers, especially those who employ mostly women.

RNIB

Project Name –RNIB Older Workers retention Pack

Funded Amount - £17,649

Project Summary - The project has been designed to reduce inequality where older workers, with a sight loss condition, leave employment at the point of diagnosis or deterioration in their sight loss condition. They are 50% more likely to give up work than the rest of the working age population. RNIB Scotland, in partnership with the Marriot Hotel Group, will develop an Older Workers Retention Resource Pack which will be made available, online and in print format, for employers across the whole of Scotland. The resource pack will provide employers with information to ensure that they are offering the support that the employee requires and to encourage good communication between managers and employees, so that relationships don’t break down, and result in job loss. 400 employers will be issued with the paper version of the resource pack, and 50 employers will be invited to take part in a retention workshop and launch of resource pack in June 2019.

West of Scotland Regional Equality Council (WSREC)

Project Name – E-POW (Equality Performance Observed in the Workplace)

Funded Amount - £35,586

Project Summary – The project team will work with private employers and their employees to improve knowledge, skills and practices to address employment inequalities within the workplace whilst creating a more inclusive working environment. Additionally, the team will engage with potential minority ethnic individuals and support them in workplace progression. The main activities include capacity building 2-3

employers to review policies and practices currently in place, providing cultural diversity, equality and unconscious bias training to 10-12 private employers as well as train the trainer training for their staff members.
